Front Disc Guard

Installation instructions for
Part# AB-21132
2013-14 RR and 2014 RS Models

1) Install the metal hub with the logo facing out using the 3 screws provided.

4) Install the guard by fitting the guard hub onto the new wheel spacer.

2) Support the bike, then loosen the 8mm pinch bolts on disc side then remove the 24mm axle nut on the same side. Loosen the remaining pinch bolts on the opposite side and remove the axle.

5) Reinstall the axle and the 24mm axle nut. Rotate the guard to the desired location before tightening the 24mm axle nut. Torque the 24mm axle nut to 50 newton meters and the 8mm pinch bolts to 10 newton meters.

3) Remove the stock wheel spacer on the disk side and replace it with the supplied spacer.

6) Your installation is now complete.

Thank you for your purchase and enjoy your Beta!
